

Intermediate Contaminant Hydrogeologist

Start Date: Immediately, or date to be negotiated

Location: Calgary, Alberta, Canada

Description

Cirrus is seeking an intermediate level contaminant hydrogeologist, preferably with four or more years of experience managing environmental assessment and remediation projects.

Consideration will also be given to strong candidates with less experience. This individual will be part of an energetic team, dedicated to building a core focus in hydrogeology. Successful candidates should have the following attributes:

- Undergraduate or graduate degree in hydrogeology, geology, geological engineering, civil engineering, or another related discipline;
- Membership, or eligibility in for membership, in APEGA;
- Knowledge of the Alberta regulatory environment is an asset
- Good organizational skills and a positive attitude, and
- Enjoy working in a team environment.

Cirrus is currently involved in a variety of diverse and challenging environmental projects that range from developing conceptual site models at industrial sites, to large-scale Brownfield developments and human health risk assessments. As such, we look for people that enjoy problem solving, engaging with a variety of stakeholders - from owners to regulators, and finding creative environmental solutions. We offer a great place to work, and an engaging culture that is based on innovation, collaboration and integrity, with excellent opportunities for growth and advancement. Our competitive salary package offers a full range of benefits options including: health, dental and extended health coverage. We have flexible work arrangements and regular team building events.
